

The formulation of a treatment plan: A contemporary approach using digital tools

ENDE's educational program consists of a basic module divided into two sessions. These focus on the foundation of our profession: collecting sufficient clinical data and accurately assessing it in order to develop a comprehensive treatment plan.

This requires diagnostic and prognostic skills and the ability to work interdisciplinary with oral surgeons, orthodontists, periodontists etc.

This is where ENDE education will boost your skills.

The formulation of a treatment plan: A contemporary approach using digital tools is an intensive, multi-stage educational program led by internationally renowned experts.

Through a structured and interactive approach, you will develop the skills necessary to create predictable, evidence-based treatment plans tailored to each patient's individual needs — often requiring interdisciplinary collaboration.

The focus of the session is modern digital treatment planning. The instructors will show the different digital tools, platforms and approaches that are available to clinicians today and how they can contribute to better planning and clinical decision-making. Also, they will demonstrate how to effectively communicate within the team and with the patient.

Program

May 13-15, 2027 München, Germany (Session 1)
September 3-4, 2027, München, Germany (Session 2)

- **A Structured Learning Journey**

Follow a carefully designed basic module that builds your skills in treatment planning — step by step.

- **Hands-On Application**

Work in teams to analyse clinical cases and formulate treatment strategies under the direct guidance of experienced mentors.

- **Holistic Development**

Move from improvisation to systematic decision-making using proven methods and tools.

- **Exclusive Settings**

Immerse yourself in inspiring learning experiences.

Main topics

Session 1 (3 days) May 13-15, 2027

- Systematic data collection and analysis
- Diagnostic assessment
- Prognostic evaluation
- Formulating a therapeutic hypothesis
- Planning the optimal treatment sequence
- Interdisciplinary treatment planning including orthodontic considerations
- Introduction to the case presentation template (used in Session 2)
- Group discussion of clinical cases presented by the instructors, based on a standardized presentation format

Session 2 (2 days) September 3-4, 2027

- Group discussion of clinical cases presented by participants, divided into groups

*Dr. Stefano Gracis,
DMD, MSD*

Prof. Nitzan Bichacho

Dr. Diego Capri

*David J. De Franco,
DMD, DMedSc*

MDT Vincent Fehmer

Dr. Jan Frydensberg Thomsen

Additional modules

Module 2

Evaluating compromised teeth: to save or to extract?
(Endodontic and restorative considerations).

Module 3

Implant Therapy Part I:
Replacing missing teeth in partially edentulous patients
with implants: the surgeon's point of view.

Module 4

Implant Therapy Part II:
Replacing missing teeth in partially edentulous patients
with implants: the prosthodontist's point of view).

Module 5

Replacing missing teeth in fully edentulous patients
without implants.

Module 6

The indications for periodontal surgery
(resective and mucogingival).

Module 7

Rehabilitation of the worn dentition.
Material Selection.

Price

Module 1

Session 1: May 13-15, 2027

Hotel MIO by Amano, Sendlinger Str. 46, 80331 München, Germany

Session 2: September 3-4, 2027

Hotel MIO by Amano, Sendlinger Str. 46, 80331 München, Germany

Early bird – valid until December 31st 2026

Price per person including hotel accommodation: 5.955,- €

Price per person without hotel accommodation: 5.255,- €

Normal price – from January 1st 2027

Price per person including hotel accommodation: 6.695,- €

Price per person without hotel accommodation: 5.995,- €

The price includes:

- 5 full on-site lecture days
- 1 online supervision day
- Comprehensive course materials, including templates for data collection in treatment planning
- 3 hotel nights: 2 nights at Hotel MIO by Amano
- 3 networking dinners
- Breakfast, lunch, snacks, and beverages during the 5 lecture days
- Certificate of completion

Upon completing the mandatory Module 1, participants will gain access to all upcoming lectures and courses offered by ENDE.

Early Bird

Valid until
December 31st,
2026

- ENDE is **unlike anything you've experienced before.**
- ENDE takes **dental education to the next level.**
- Enhance your decision-making skills in **interdisciplinary treatment planning.**
- **Join interactive group discussions** on real-life clinical cases from everyday practice.

About ENDE

European Network of Dental Education (ENDE)

ENDE elevates dental continuing education beyond technical proficiency and the correct use of materials and equipment.

The ENDE modules focus on the very foundation of our profession: collecting and evaluating sufficient clinical data to formulate a qualified treatment plan.

This requires both diagnostic and prognostic skills — and often the ability to collaborate across disciplines, involving oral surgeons, orthodontists, and periodontists. This is exactly where the ENDE programme strengthens your competencies and clinical judgement.

The ENDE concept was developed by an international board of some of Europe's most accomplished clinicians, educators, and dental technicians.

The board members possess extensive expertise in both developing comprehensive treatment plans and executing complex treatments.

Get inspired by free webinars

In 2025 and 2026, ENDE hosted webinars offering a preview of what the ENDE educational programme entails. You can watch the webinars and learn more about ENDE at **ende-edu.com**

Webinar focus

- A complex patient case presented prior to treatment by the attending dentist
- Panel discussion with renowned specialists evaluating various tentative treatment plans
- The final treatment plan
- Presentation of the completed case, including clinical images and treatment outcomes
